

## Fact Sheets on Health Literacy BIBLIOGRAPHY

This bibliography contains more than 200 references used to prepare the Center for Health Care Strategies' *Fact Sheets on Health Literacy*. The Fact Sheets and this bibliography can be printed or downloaded from <http://www.chcs.org/resource/hl.html>.

This bibliography includes 226 documents published between January 1990 and December 2002. We began with the references used in the original Fact Sheets, published in 1997, the National Library of Medicine and Harvard School of Public Health (NCSALL) bibliographies, as well as Medline searches. Additional documents were added from the reference lists of the publications reviewed, personal communication with researchers and other experts in the field and from postings on the National Institute for Literacy's (NIFL) Health Literacy listserv. [See Fact Sheet #9: "*Resources for Health Literacy Information and Publications*" for how to access these directly.]

This bibliography also is available as a searchable Endnote® bibliographic database, including keywords and abstracts, some of which were downloaded directly from Medline. It can be downloaded into your own Endnote, Procite, or Reference Manager file. To obtain the Endnote bibliographic database, please e-mail your request to [cm@chcs.org](mailto:cm@chcs.org). To obtain more information about Endnote, go to [www.endnote.com](http://www.endnote.com).

The CHCS Fact Sheets on Health Literacy, bibliography, and bibliographic database were prepared by Linda Potter and Constance Martin, with funding from the Commonwealth Fund and Pfizer Inc. Please direct any requests, questions, or suggested modifications and additions to [cm@chcs.org](mailto:cm@chcs.org).
